

The right caregiver. The right match. The right hand.

Caregiver matching, eligibility and compliance. DoveOnDeck brings together a client's needs, schedule, location and preferences with each caregiver's skills, availability and current credentials, and presents the choices as a familiar deck of cards so the best fits are easy to see and caregivers who are not eligible stay out of the hand.

Who it helps

- Schedulers and care coordinators
- Clients and families who want a say
- Caregivers who want the right clients
- Referral sources who need a reliable start of care

What it helps with

- Matches on skills, schedule, distance and preferences (pets, non-smoking, language)
- Credential and expiration tracking so only eligible caregivers are offered
- Client choice of a requested caregiver respected where possible
- Assessments and referrals feed one client profile
- More consistent caregivers, fewer poor fits

How it completes the circle

Matches the right caregiver. DoveOnDeck completes the circle at the moment that matters most to a family: who walks through the door.

In practice (illustrative): *A new client loves her two cats, prefers Spanish and needs help with transfers. DoveOnDeck brings the caregivers who fit — skills current, schedule open, close by — to the top of the deck.*

Works with: **DoveOnCall** · **DoveRescue** · **DoveOS** · **The DOVE News** · **DoveStuff**
