

One circle for your whole agency.

A cloud operating system for the whole home-care agency: clients, caregivers, referral sources, scheduling, electronic visit verification with location-checked clock-in and clock-out, same-day client review and signatures, payer authorizations, billing exports, documents, contract templates, messaging and the DoveOS dashboard.

Who it helps

- Agency owners and administrators
- Schedulers, billing and HR staff
- Caregivers (one app for their day)
- Clients and families (visit review and updates)

What it helps with

- One shared record used by every Dove Circle product
- Payer classes: VA, long-term care insurance, private pay, AAA/state, Medicaid/Medicare, nonprofit
- Authorizations, authorized hours and rates tracked against visits
- Exports designed for QuickBooks, Sage, Ramp and Bill.com file formats (planned)
- Document storage, templates and a consent-based contact list

How it completes the circle

Runs the whole agency. DoveOS is the hub of the circle: it keeps every visit verified, every authorization respected and every bill accurate.

In practice (illustrative): *A visit ends. The caregiver clocks out at the client's home, the client reviews the visit and signs, and the hours count against the right authorization for billing.*

Works with: **DoveOnCall** · **DoveOnDeck** · **DoveRescue** · **The DOVE News** · **DoveStuff**

Get started

- TDC-FRM-401 Daily Visit Acknowledgment
- TDC-FRM-402 Incident Report
- TDC-FRM-403 Change-of-Service Request
